Troubleshooting

•**Question 1:** I can't log into the website. Each time I type in my password I am redirected back to the first screen, what should I do?

Firstly, try the process on another machine connected to the Internet. If you are still unable to log-in, check that your firewall isn't restricting your access. Some networks or personal firewalls are configured to restrict access to some websites for security reasons. You may have to use another computer outside your current network. If neither of these solutions work, please email info@unsw.touch.asn.au for further directions.

•**Question 2:** Can I have someone else register for me?

No.
